PROFESSIONAL EXPERIENCE

Full Stack Software Development Engineer

Stashfin (EQX Analytics Pvt. Ltd.)

📅 April 2024 – Ongoing

📍 Gurugram

- Developed admin APIs for a **Game engine** in **Node.js** using the **Fastify framework**, facilitating game creation, task management, and reward allocation integrated with financial services like loans and insurances.
- Developed a comprehensive **insurance** responsive web page, accessible across various devices. The web page served as a pivotal resource utilized by the mobile team company's app through deep linking. Technologies used :**ReactJS, SCSS, and Redux-Saga, RestFul APIs.**
- Implemented robust **event tracking** by consuming **CleverTap** APIs to capture user interactions and activities on the insurance web page, optimizing engagement strategies.

Software Development Engineer

Origo Commodities India

📅 MAR 2022 – April 2024

📍 Gurugram

FULLTIME : Aug 2023 - April 2024

- Proficiently Developed responsive **Front-end** components using **React.js, React Hooks, and Redux**, achieving efficient state management. Executed the full-scale development of Origo eCash (Web), enabling instant credit provision at a record-low **0.7%** interest rate. Seamlessly integrated RESTful and third-party APIs, optimized performance by **70%** through **code splitting, reusable components, memoization, and leveraging React libraries.**
- Spearheaded the holistic management of diverse platforms, including the trade finance web app **Tradefi**, the **Flutter-based** mobile app **Origo eMandi** and the corporate website **Origo India**, powered by WordPress and PHP.

INTERNSHIP : Mar 2022 – July 2023

- Revolutionized **Origo eMandi's** frontend, leading a full redesign using Figma for UI enhancements. Achieved a **70%** functional improvement by transforming the outdated, non-responsive UI into an aesthetically pleasing, responsive interface with **media queries**, eliminating redundant code, and enhancing user experience.
- Launched **Origo eResearch** introducing CanvasJs charts for in-depth commodity price trend analysis (1 Day to 5 Years) within Origo eMandi.

PROJECTS

PortFolio Website

- Created a personal portfolio website from the ground up, showcasing my skills, projects, and accomplishments using **HTML, CSS, JavaScript, ReactJS, SCSS, and React libraries.**
- Implemented **responsive design** for optimal viewing across devices, ensuring a seamless and interactive user experience.

Rental Storey

- Developed a user-friendly platform with **ReactJS, MongoDB, and Java Spring Boot**, providing a **100%** free-to-use solution for managing properties, rooms, tenants, and rental fees.
- Enabled property owners to manage rental properties and track tenant information easily, ensuring a seamless and **cost-free rental management experience.**
